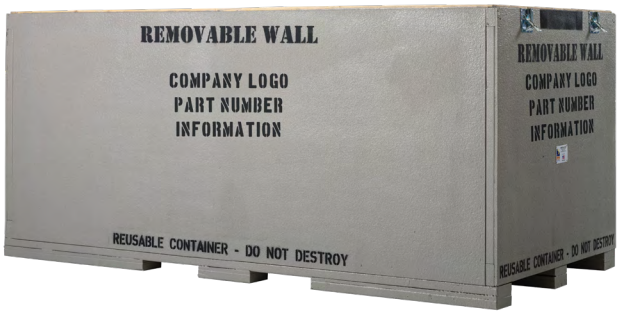
TRANSPORT CONTAINERS

Repeatable Protection and Performance

When delivery of sensitive hardware is critical for high value assets, get specialized transport containers engineered and manufactured by MM Solutions.

Keep your flight hardware or other sensitive products safe in transit. Loading and unloading will be more efficient with the innovative engineered features we build into every container. Eliminate program delays and ensure safe arrival with packaging that exceeds the performance of traditional Ground Support Equipment (GSE).



Industries

- Satellites/Space
- Military
- Aerospace
- Medical
- Energy
- Commercial

Materials

- Metal
- Plastic
- Composite
- Encapsulated Wood

Engineered Solutions

- Custom locking mechanisms, hardware, and coatings
- Specialized loading and fastening systems
- Toolless options
- Shock and vibration analysis
- Data logging equipment
- Ingress protection (IP) for all transit conditions
- CNC machined hardware interfaces
- MIL Spec hardware and performance

Services

- Managed return and recertification, and reuse program
- Just In Time (JIT) delivery services
- Transportation management
- Expert cleanroom certified loading and unloading team
- Asset tracking and data management

MADE IN USA

ITAR International Traffic in Arms Regulations

platinum REGISTRATION, INC. AS9100:2016 CERTIFIED
