Qu-Dyn-07

Qu-Dyn Series · Air-Core Square Magnetorquer

Overview

The Qu-Dyn-07 is an air-core square magnetorquer providing a nominal dipole moment of 0,7 Am² at 5 V for CubeSat attitude control: detumbling, momentum dumping and fine attitude adjustments.

With no ferromagnetic core it has no residual magnetic moment and a perfectly linear response, and its flat 50 × 40 × 14 mm form factor integrates easily on panels and structures.
